M4x Mini-Blade using M4x Communication Technology

Designed by our engineers with your needs in mind - your Idea Shop.

The M4x Mini-Blade quickly connects to your laptop via USB. It has two ports and offers the same easy-to-use software as the M4x Blade for added flexibility. In addition to functioning in all the same ways as a bridge, it provides many more features and capabilities, such as:

- Tone Remote Control
- 2175 Notch Filter
- Voice Frequency Switch

Event-driven, intuitive software enables you to configure the ports as necessary. It has just the right number of ports to perform the following:

- VOX and Audio Delay
- DTMF Radio Channel Steering
- Troubleshooting

One 2-Channel Module, 2 ports

GREATER FLEXIBILITY:

Choose a different module (2 ports) based on your needs.

- RS-232 Module
- Relay Module
- PSTN Access Module
- 4-Wire Telephone Module
- 2-Wire Telephone Module

Two RS-232 data channels
Six double throw or 8 single throw contacts
Two channels of PSTN access
Two 4-wire telephone connections
Two 2-wire telephone connections

If your application calls for more than two ports, consider the M4x Blade to configure up to eight ports!

The 'Idea Shop' committed to solving engineering problems & exceeding expectations.
